CTS Data Cabling

CTS understand the importance of a tested network installation and provide the latest in data cabling and WIFI solutions, ensuring a strong backbone for your communications and office equipment.

Scanned and guaranteed for your assurance.

CTS have a vast experience in data cabling, assisting with the fibre roll out throughout New Zealand and have been cabling and connecting businesses for over 30 years.

Technology has advanced – Fibre's speed has enabled data/voice, communications, multi-media, smart devices, surveillance & security. This digital equipment is constantly evolving and introducing opportunities and efficiencies for your business. CTS ensure your network & cabling infrastructure is future proofed and capable of growing with your business.

Specialists in ethernet & fibre connection, network equipment & installation, WIFI and wireless optimisation.

Experienced in new & existing businesses, Schools, Commercial builds, government departments…no business is too big or too small.

Identifying and prescribing the best solution for your business layout and set up is an integral part of what we do. Whether it's a wireless network or a secure hardwired solution, or a combination of both…we will work with your IT managers, Security & lift services, and builders and painters to ensure the process is as seamless as possible.

Total project management, from planning, procurement, installation & integration.

Tested & Site Safe certified for your quality assurance.
